

## Art Challenge – to draw still life from observation

Choose an object you would like to draw. It can be anything you like, as long as it does not move. It could be a collection of objects. This is called still life drawing. I have chosen a lily flower.

Lightly sketch an outline of the object. Focus on proportion – how the different parts fit together.

Now you can add colour or continue to use a pencil to shade in your drawing. Focus on areas of light and dark to create contrast. This will help your drawing look more 3D.

I used watercolour pencils, which are a really nice way to make the colours vibrant.

Finally, relax and have fun!
