

The Birth of the Industrial Revolution

Use the boxes below to note down two (or more!) reasons why each factor was important in the industrial revolution. When you have made notes, give each factor a number based on its importance in your opinion. Give the **most important** a '1' and order the rest down to '6', which is the **least important**.

Population Boom <input data-bbox="667 353 783 465" type="text"/>	Agriculture <input data-bbox="1390 353 1506 465" type="text"/>
Factories <input data-bbox="667 743 783 855" type="text"/>	Power <input data-bbox="1390 743 1506 855" type="text"/>
Transport <input data-bbox="667 1075 783 1187" type="text"/>	Empire <input data-bbox="1390 1075 1506 1187" type="text"/>

Now that you have chosen your order of importance, **explain** why you have made your choices for 1 and 6.
