Halving

Halving means to split things into two equal amounts. Jack and Mia have some lollipops. Split them so that Jack and Mia have the same number of lollipops.

| Lollipops	Number of lollipops	Lollipops for Jack	Lollipops for Mia
	4	2	2

Halving

Halving means to split things into two equal amounts. Half each number shown and draw that many spots on the wing of each ladybird. The first one has been done for you.
